

The Philadelphia Department of Health and Quality Insights present:
Asymptomatic Bacteriuria: Myths, Magic and Management

Thursday, January 21, 2016
12:00-1:00 p.m. ET

Agenda:

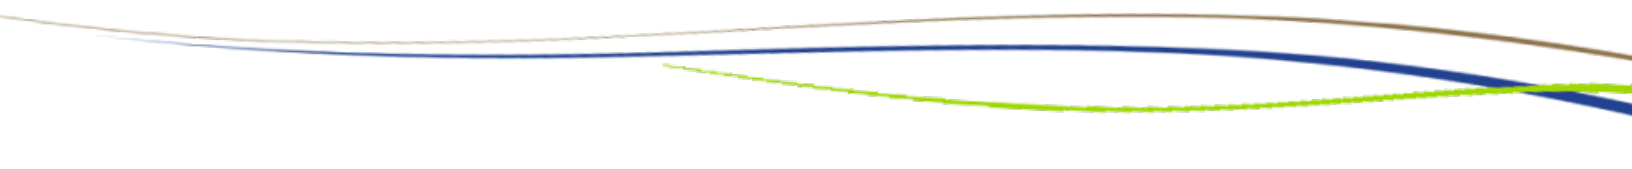

- 12:00 - 12:05 p.m. Introduction
- 12:05 - 12:50 p.m. **Christopher A. Ohl, M.D**
Dr. Ohl will assist participants to understand the difference in a UTI and asymptomatic bacteriuria. The consequences of treating asymptomatic bacteriuria (when it's not necessary) will be explained.
- 12:50 - 1:00 p.m. Question and answer session

Speaker:

Christopher A. Ohl, M.D.

Dr. Ohl received his B.A. degree from the University of Wisconsin-Eau Claire and his M.D. degree from the University of Wisconsin School of Medicine. He completed his internship, residency and fellowship training in internal medicine and infectious diseases at the National Naval Medical Center. He is Board Certified in Internal Medicine and Infectious Diseases and earned the ASTMH Certificate of Knowledge in Clinical Tropical Medicine and Travel Medicine.

Dr Ohl served in the U.S. Navy Medical Corps as a general medical officer from 1987 until 1990 and an infectious diseases staff and attending physician at the National Naval Medical Center form 1994-1997. He was an Assistant Professor of Medicine at the Uniformed Services University and later joined the infectious diseases faculty at East Carolina University School of Medicine. He is currently a Professor of Medicine in Infectious Diseases at Wake Forest University School of Medicine in Winston-Salem, NC and Medical Director for the Center for Antimicrobial Utilization, Stewardship, and Epidemiology (CAUSE). He served on the SHEA Antimicrobial Stewardship Committee and is a consultant on antimicrobial stewardship for the Infectious Diseases Society of America, Centers for Disease Control, Institute of Healthcare Improvement, and Joint Commission Resources.

Audience:

Hospitals are encouraged to convene an interdisciplinary team for webinar participation, including Infection Preventionists, front line nursing staff, physicians, pharmacists, quality staff, managers and hospital executives.

Objectives:**Objectives for this webinar:**

1. List 5 clinical criteria that help differentiate a urinary tract infection from asymptomatic bacteriuria
2. Know that “mental status changes” in the setting of an abnormal urinalysis or positive culture is often not a urinary tract infection
3. List 3 adverse consequences that can occur from treatment of asymptomatic bacteriuria
