

Policy Related to Healthcare Disparities among Minorities in WV: A Deeper Look

QIN-QIO Regional Support and Sharing Call

Wednesday, November 17, 2021 / 1:00 - 2:00 p.m. ET

[REGISTER NOW](#)

Healthcare disparities exist in West Virginia. Research suggests that minorities and vulnerable populations bear the burden of chronic diseases in the state. Additionally, things like policy and geographic, socioeconomic, and cultural differences create barriers to implementing effective healthcare services. Because of this, it's never been more important to find strategies and solutions to address these disparities. This webinar will provide an opportunity to explore the causes and potential solutions around healthcare disparities in West Virginia.

Recommended Audience

The information presented is appropriate for nurses and other healthcare providers.

Continuing Education Credits

To receive continuing education credit, participants must:

- Watch the webinar
- Complete the evaluation

Quality Insights and the presenter have no identified conflicts of interest.

This course is approved for 0.75 hours of Continuing Education for Nursing. Quality Insights accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.
